General Cabell said this meeting had been called to consider problem facing the REGAL program and asked statement of this problem to those present. Said that here has recently been installed in leveloped by the Office of Communications which would increase the production of material by 2/3. However at the present 2 time he is unable to make use of this equipment due to lack of personnel. Pointed out that actually an employee with a high school education and about ten days training could earn to operate this equipment satisfactorily and he believed with the addition of 108 people we could keep current in processing the material in question and eat into the backlog. This is the material in the said of the same proposed until the summer months, therefore he saw no alternative that to ask the Deputies to assign on—duty personnel to this project (provided they can be granted an SI clearance) if the translated since we have no way of knowing without. General Cabell said this meeting had been called to consider problem facing the RECAL program and asked utline this problem to those present. Said that here has recently been installed in equipment eveloped by the Office of Communications which would increase he production of material by 2/3. However at the present 2 ime he is unable to make use of this equipment due to lack of ersonnel. Pointed out that actually an employee ith a high school education and about ten days' training could earn to operate this equipment satisfactorily and he believed ith the addition of 108 people we could keep current in rocessing the material in question and eat into the backlog. Ol. White noted it was his understanding that 135 people are equired  hite went on to say that we have more clerks in the pipeline han ever before, however, these people will not be fully rocessed until the summer months, therefore he saw no alternative ut to ask the Deputies to assign on-duty personnel to this roject (provided they can be granted an SI clearance) if the regency of processing current material and cleaning up the ackloa is such to warrant this action. General Cabell asked what we would gain by taking immediate action rather nan waiting until we could recruit the necessary bodies. Mr.  replied this would be hard to determine until such time the material on hand and currently being received could be		Messrs, Kirkpatrick, Helms, Sheldon, Gen. Truscott,

25 YEAR RE-REVIEW

Mr. Amory said he wanted to second Mr. Wisner's comment and that he too would be unable to meet numerous requirements placed on him for spot papers, estimates, analyses, etc.

Mr. Wisner then asked if Agency personnel ceilings could not be lifted in view of demands for additional activities and stepping up of other activities already in existence. Mr. Kirkpatrick suggested that the PRC sit down and review our current programs and activities and come up with a recommendation on personnel ceilings. (No decision was made on this.)

25X1

Mr. Wisner recommended that: 1) before any final decision is made each Deputy have the opportunity to consider how the transfer of personnel will affect other projects. 2) a report on this be made at a future meeting. General Cabell replied he saw no alternative but to embark on this program immediately and that its progress be reviewed from time to time.

Approved For Release 2009/01/02 : CIA-RDP80B01676R002300190016-2

It was therefore agreed that: 1) DD/P, DD/I and DD/S would begin to detail their proportionate share of employees (this to be accomplished in increments of 18 per week);

4) personnel be recruited for assignment to this project or to replace those people transferred to it from other components and who do not wish to return to their old jobs; 5) the increase of employees required to step up this program will

be over and above the Agency ceiling and will not be charged to the currently authorized ceilings of DD/I, DD/P and DD/S.
